

TOO MUCH BOOST

IT'S NOT IN OUR VOCABULARY EITHER!

LET'S GET TO THE POINT

BorgWarner S400SX turbos employ "S" generation compressor wheels that incorporate extended tip technology. This unique compressor wheel design feature enables faster turbo spool-up and higher pressure ratios than standard wheel designs.

BOOST TO SATISFY YOUR NEEDS, STREET OR STRIP

Designed specifically to bolt-into existing high performance applications, the S400SX offers an array of turbine housing configurations for a variety of your performance requirements.

For over 50 years, BorgWarner Turbo Systems have been powering the fastest and most prestigious racecars and OEM performance vehicles around the world.
